WHY CHOOSE HDPE OVER WOOD

✓ Waterproof
Ideal for bathrooms, kitchens and wet areas – no swelling.

✓ Termite-proof
HDPE gives termites nothing to eat.

✓ Rot-proof
Never rots, cracks or warps like wood.

✓ Wood-grain finish
Looks like real wood – walnut, mahogany and more.

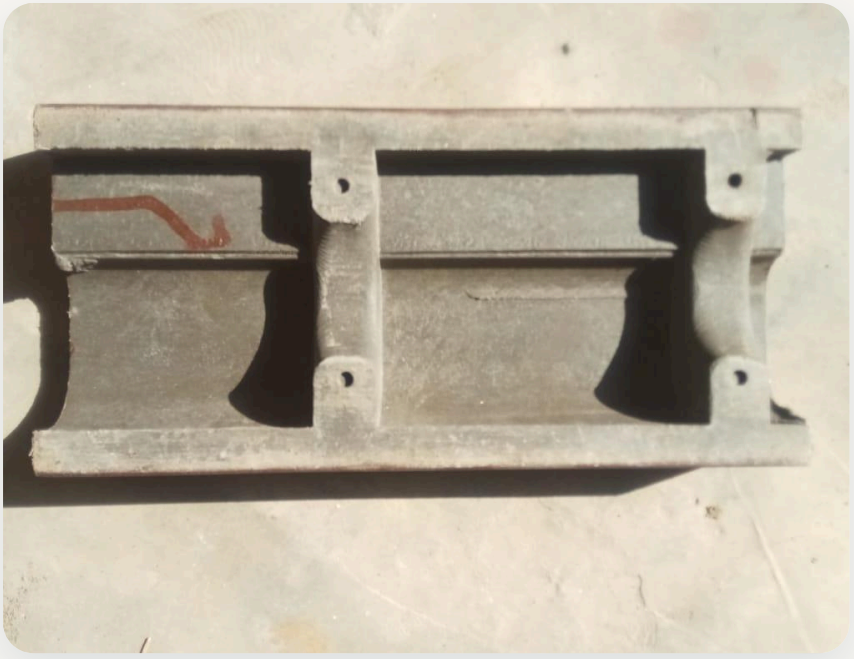

✓ Strong fixing
Fixed after plastering with 4" screws & rawl plugs.

✓ Neat & quick
Gaps sealed with PU foam – no cement filling needed.

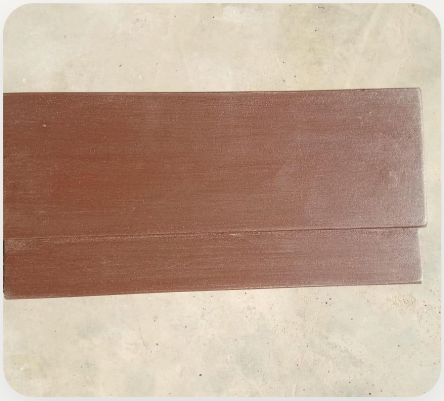

HDPE DOOR FRAMES · CLOSE-UP

Look closer. Built to last.

Real photos of the frame profile. Solid HDPE – no wood inside, so there is nothing to rot, swell or feed termites.

1. **Engineered profile**
   Inner ribs hold the 4" screws firmly in place.
2. **Hollow chambers**
   Light to handle, yet rigid and straight.
3. **100% HDPE**
   Waterproof right through – ideal for bathrooms and kitchens.
4. **Cut to your size**
   Supplied to your opening and wall thickness.

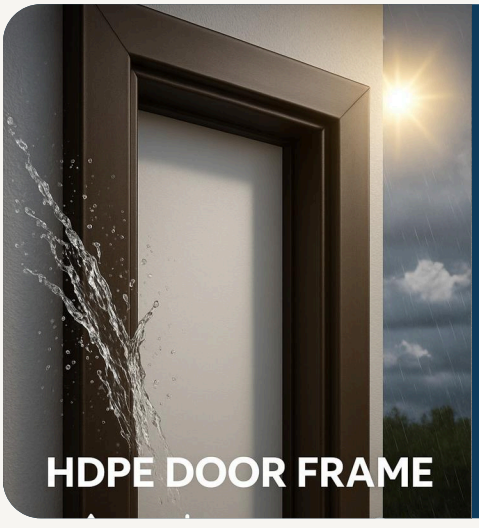

Built-in door stop
Stepped profile for a neat close

Wood-grain finish
Looks like real wood

No maintenance
No polish, no termite treatment

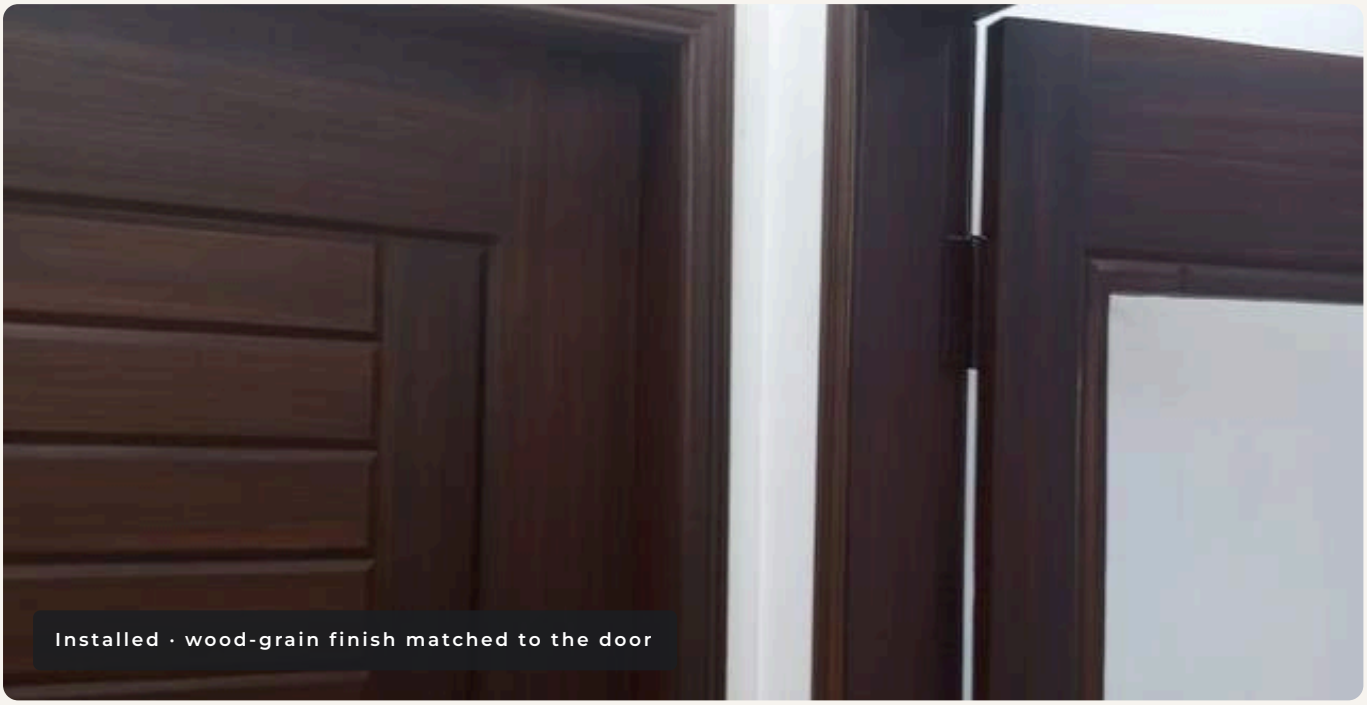

MADE FOR PAKISTAN'S WEATHER

Rain, heat or humidity – it stays perfect.

- ✓ 100% waterproof
- ✓ UV-protected
- ✓ Weather-resistant
- ✓ Termite & rot-proof
- ✓ No maintenance
- ✓ Lifetime warranty

A frame that lasts *as long as the door.*

Installed · wood-grain finish matched to the door

Moisture & termite proof

Will not rot, swell or be eaten by termites — even in washrooms.

Wood-grain finish

Matches DEX fiber doors for a seamless look.

Stable profile

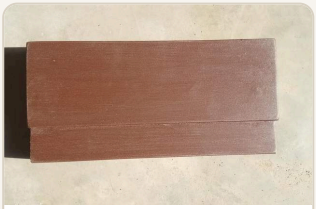

Straight, true frames that keep doors closing properly.

Standard hardware

Takes regular hinges, locks and screws.

HDPE VS. WOODEN CHOKHAT

	HDPE	WOOD
Moisture	Does not absorb water	Swells and rots
Termites	Termite-proof	Main cause of failure
Shape	Stays straight	Warps and twists
Finish	Wood-grain, no polish	Needs paint & polish

Wood-grain surface

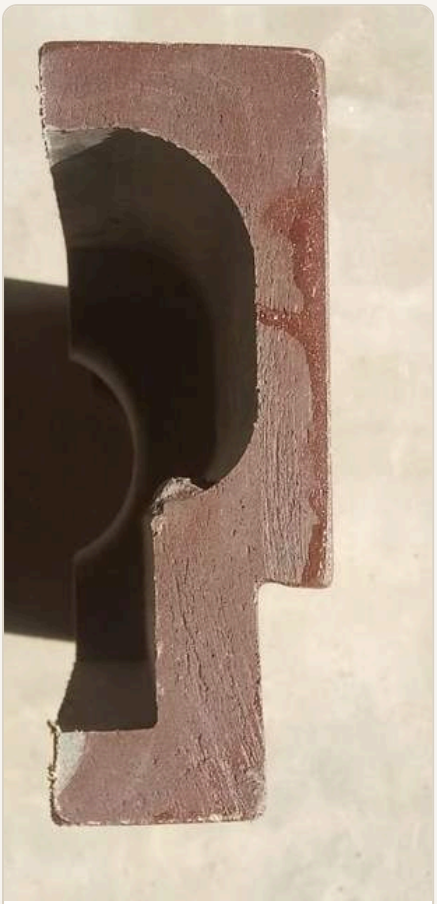

Even finish along the full length.

Rebated edge

Door stop moulded into the profile.

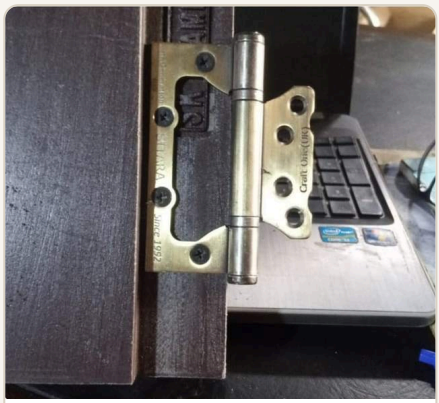

Engineered profile. *Wood-grain finishes.*

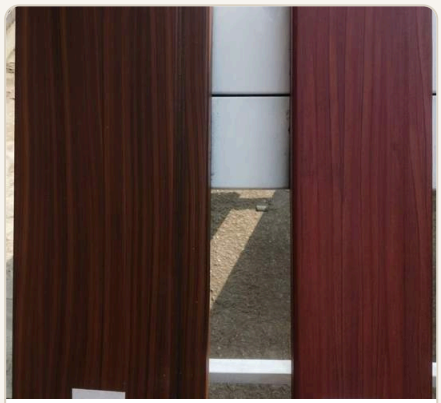

Solid, rebated profile
An internal channel adds strength without extra weight.

Reinforced back
Fixing points for secure installation.

Standard hinges
Screw straight into the frame.

Walnut & mahogany
Straight-grain finishes.

Wave & ebony
Textured statement finishes.

Finishes
Teak, mahogany, walnut and textured — custom shades on request.

MADE TO SIZE

Cut to your openings, *packed for site.*

Every frame is labelled with its size and stretch-wrapped, so your team fits the right frame to the right opening.

Stretch-wrapped bundles
Protected in transit and on site.

Size-labelled
Each frame marked for its opening.

Full lengths
Ready for dispatch.

HDPE DOOR FRAMES · SIZES

Standard sizes & wall thickness

Frames are supplied as a complete set (2 sides + top). Choose your door size and the thickness of your wall.

Frame size width × height (ft)	Running length (ft)
2.5 × 6.5	15.5
2.5 × 7	16.5
2.5 × 8	18.5
3 × 6.5	16
3 × 7	17
3 × 8	19
3.25 × 6.5	16.25
3.25 × 7	17.25
3.25 × 8	19.25

Frame size width × height (ft)	Running length (ft)
3.5 × 6.5	16.5
3.5 × 7	17.5
3.5 × 8	19.5
4 × 6.5	17
4 × 7	18
4 × 8	20
5 × 6.5	18
5 × 7	19
5 × 8	21

AVAILABLE FOR WALL THICKNESS

5"
wall thickness

5.5"
wall thickness

10"
wall thickness – single

10"
wall thickness – double

HOW WE INSTALL

1 · After plaster
Frame is fitted once the wall plaster is complete

2 · Screw fixing
Fixed with 4" screws & rawl plugs into the wall

3 · PU foam
Gaps filled with PU foam – no cement filling needed

Custom sizes: other widths and heights are made to order – share your door openings and wall thickness on WhatsApp **0323 1525249** for prices and delivery.

REAL SITE INSTALLATION

How we install, step by step.

Photos from a real DEX installation site. Our own team installs in Islamabad & Rawalpindi – frames are delivered all over Pakistan.

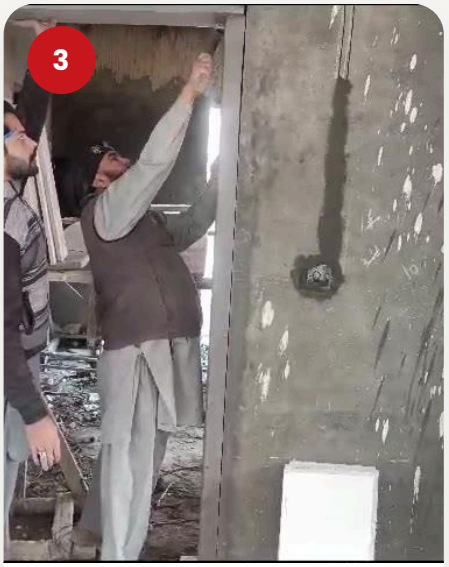

Cut to exact size

Measured and cut on site to your opening.

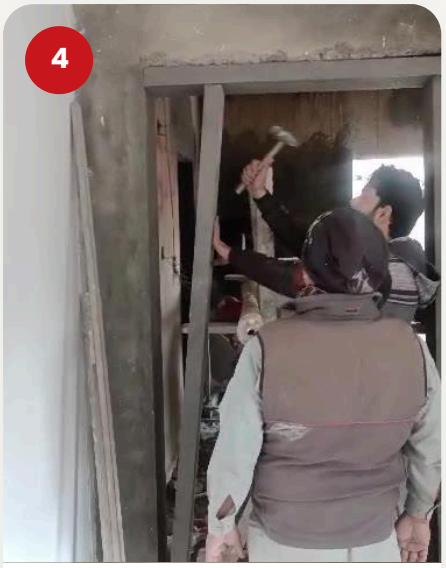

Placed after plaster

Fitted once the wall plaster is complete.

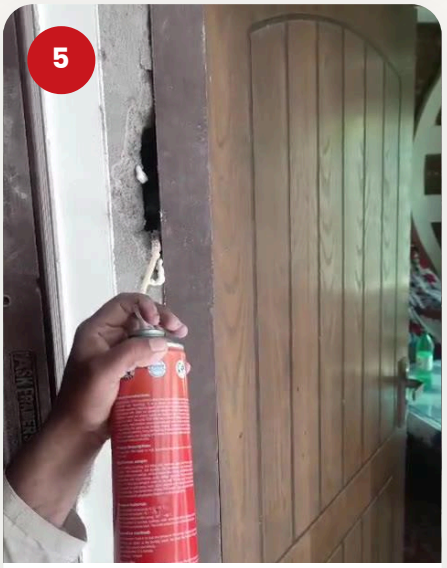

Aligned & checked

Set straight, level and square.

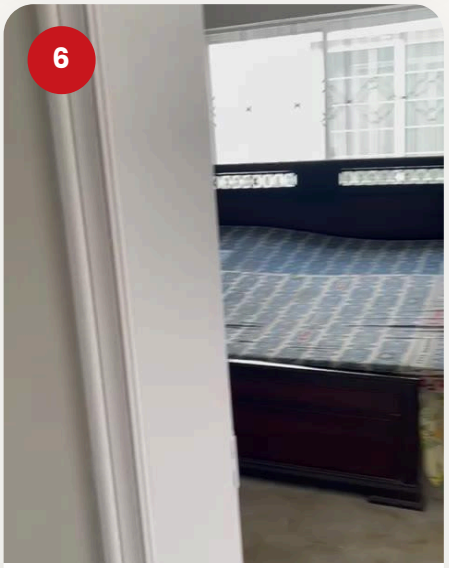

Fixed with 4" screws

Screws & rawl plugs into the wall.

Gaps filled with PU foam

Neat seal – no cement filling needed.

The finished result

Clean, strong and ready for the door.

WHY THIS METHOD

Fitting after plaster keeps the frame clean and undamaged. Screw fixing makes it strong, and PU foam seals the gaps neatly – no messy cement work at the back.
